

Gx Series

Entry & Mid-Range Data Archive Libraries

Plasmon™ Gx-Series UDO® libraries are the market leader for professional archival storage. They feature the industry's most reliable architecture that ensures high data availability for business critical data archives. Gx-Series libraries with 60GB UDO2 drives can read data written on 30GB UDO1 media.

The direct attached libraries are controlled through a SCSI interface and include state-of-the-art features such as dual media transport assemblies.

Gx-Series libraries feature UDO drives and media which are the industry standard for professional optical storage. UDO archive solutions offer unmatched data authenticity and longevity, consume much less power than magnetic disk based archives and deliver a very low Total Cost of Ownership. Second generation 60GB UDO2 media is available in True Write Once (WORM), Compliant Write Once and Rewritable formats.

Gx80 Entry Level Gx-Series Library

The Gx 80 library can be configured with 2 or 4 drives, and scales to up to 80 slots or 4.8 TB. Available standalone or with 19 inch rack mount kit.

Gx174 Midrange Gx-Series Library

Solid, dependable optical archives with 2, 4 or 6 drives, scaling up to 174 slots with a storage capacity of 10.4 TB.

Investment Protection is Key

Select from two models that are designed to maximize professional data archiving requirements ranging from entry-level through mid-range. Slots are license key enabled and can be scaled-up at any time right onsite. *Invest in today's requirements and expand for tomorrow's!*

There are many benefits to the intrinsic scalability of the libraries:

- Empowers businesses to increase storage capacity incrementally as archiving demands increase
- Budget for future expansion
- Accommodate data growth without changing the footprint size
